

Riding the St. Charles Streetcar with Limited Mobility

Identifying ADA-Accessible Streetcars

The ADA-accessible streetcars on the St. Charles Streetcar line are marked with an ADA symbol on the front and on the side of the vehicle. Currently there are three ADA-accessible streetcars with plans to expand.

How to Ride with Limited Mobility

Riders with mobility devices like a wheelchair can only enter and exit one of the accessible streetcars at accessible stops. There are **12 ADA-accessible stops (six Inbound and six Outbound)** on the St. Charles Streetcar line. These stops are able to accommodate the wheelchair lift on the streetcar.

All other streetcar lines and all bus lines are ADA-accessible.

How to Find ADA-Accessible Streetcars and Stops

Use our Trip Planner at norta.com to plan your trip.

- On norta.com, select Routes & Schedules from the tab list at the top of the home page.
- A “Select Service” drop down menu will appear below the tab list.
- Select “Streetcar.” In the “Select Route” menu, then select 12 St. Charles Streetcar.
- It will load a trip planner with an option to view only wheelchair accessible streetcar stops.

The ADA-accessible streetcar icon will appear blue on Trip Planner and on RTA's official website as shown here.

Use the *Le Pass* app to purchase fare ahead of time.

Plan. Pay. Ride.
